

Super HiCELL400

S-series

Super Integrated Machining Cell

Super HiCELL 400

“Eco · eco[®]”

Super Integrated Machining Cell

**Superior Unique Technologies Present
High Accuracy,
Process Integration, and Complete Machining**

**(CNC Lathe +Machining Center)
"Eco•eco[®]"
Super Integrated machining cell
Super HiCELL 400**

Triple-station turret head (PAT.pending)

1 the 1st station

Turning tool station

Thermal growth is minimized by separating the machining spindle from turning tool station.

2 the 2nd station

Machining tool station

The maximum Spindle speed
10000min⁻¹(rpm)

3 the 3rd station

Assist station

Special tools, combined tools, or dedicated finishing tools can be used.

Specifications

● Swing over bed	710mm(28")
● Chuck outside dia.	380mm(15")
● Max.shft length	1100mm(43.3")
● Bar capacity	103mm(4.0")
● Turning spindle speed (Motor)	20~3000min ⁻¹ (rpm) 37/30kW(50/40HP)
● Rotating spindle speed (Motor)	100~10000min ⁻¹ (rpm) 25/22kW(33/30HP)

- Super HiCELL 400 is composed of 4 axes, **X Y Z C**, enhancing the versatile machining functions of the well known HiCELL 40 II.
- Hitachi Seiki's unique triple-station turret is employed. The turning tool station and the machining tool station are separated, and also a special high tensile strength material "COOL METAL[®]" is used, so that thermal distortion can be minimized. Further, the assist station is available for combined tools or special tools.
- High-performance machining spindle provides versatility of machining.
- High speed ATC unit can store up to 32 tools as standard.
- The sub-spindle (optional) enables finishing a complex workpiece in a single set-up.

Powerful Cutting and High Productivity

Super HiCELL 400 Cutting capacity

Material:Carbon steel

Turning Spindle

OD turning	(Depth of cut x Feed)	14 x 0.5mm/rev.(0.55" x 0.02ipr)
ID turning	(Depth of cut x Feed)	9 x 0.5mm/rev.(0.35" x 0.02ipr)
OD grooving	(Width x Feed)	8 x 0.1mm/rev.(0.32" x 0.004ipr)
ID grooving	(Width x Feed)	7 x 0.1mm/rev.(0.27" x 0.004ipr)
Face grooving	(Width x Feed)	8 x 0.1mm/rev.(0.32" x 0.004ipr)
Drilling	(Dia. x Feed)	φ 50 x 0.4mm/rev.(2.0" x 0.015ipr)

Machining Spindle

Face mill	φ 80mm(3.1") 4-blade (Depth of cut x Width x Feed)	4 x 80 x 600mm/min.(0.15" x 3.1" x 23.6ipm)
End mill(Grooving)	φ 32(1.26") 2-flute (Width x Depth of cut x Feed)	32 x 20 x 0.15mm/rev.(1.26" x 0.78" x 0.006ipr)
End mill(Side grooving)	φ 32(1.26") 2-flute (Width x Depth of cut x Feed)	20 x 16 x 0.15mm/rev.(0.78" x 0.63" x 0.006ipr)
Drill	(Dia. x Feed)	φ 40 x 0.3mm/rev.(1.6" x 0.012ipr)

*Accuracy data are the actual results obtained under static testing conditions in a temperature controlled environment per JIS-Standard.

Machining Spindle

Equipped with a 25kW high power built-in motor and it removes material just like a machining center with #50 taper spindle.

S Q C T (K V) Tooling System

Hitachi Seiki's
unique tooling system
<Patented>

S : Solid and Super
Q : Quick
C : Change
T : Tool

Features

1.Stable heavy-duty cutting

Short taper shank and 2-face contact where a taper and an end face are restrained to support heavy-duty cutting

2.Strong solid tool lock system

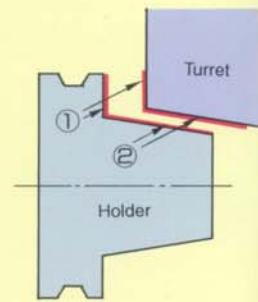

Instead of conventional spring system, the new clamp system containing a wedge mechanism holds the tools with a 1.4-ton force.

3.High accuracy

ATC tool change repeatability in X and Z axes is 2 μm.

4.Commercially available universal tools can be used.

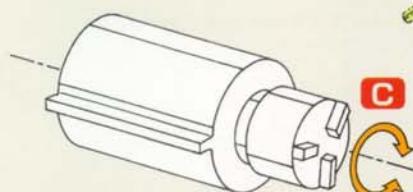

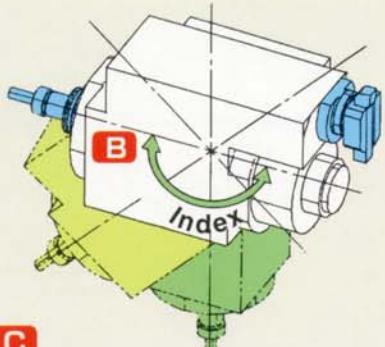

Economical tooling system.

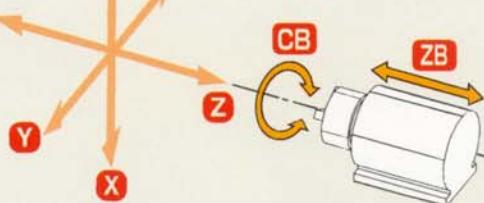

Low thermal expansion

Triple - station turret head

Use of cool metal
(Special high tensile strength material)
(less thermal expansion)
5 deg. index(std.)

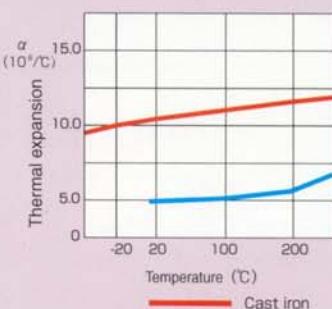

Main spindle

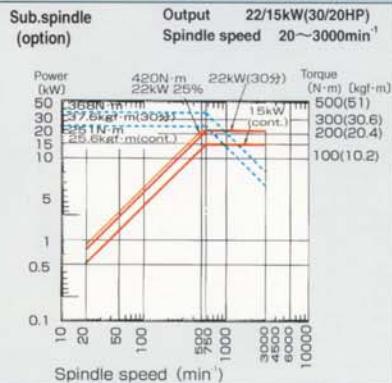

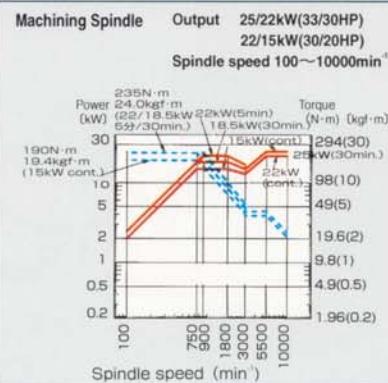

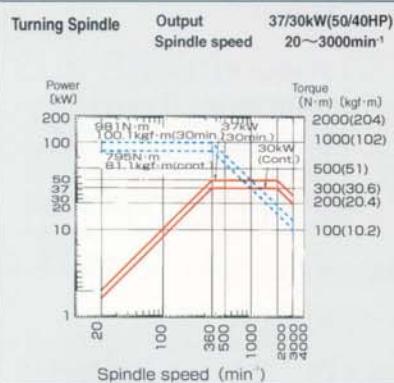

Sub spindle

Option

Temperature vs. thermal expansion coefficient of cast iron.

Spindle Output Diagram

SQCT system(KV) of Super HiCELL 400 is effective particularly for OD turning.

Simultaneous machining of OD and end face does not cause problems as shown below.

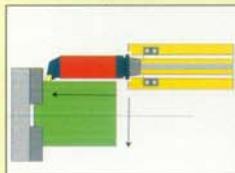

① Special tool is required.

② Spindle expands by heat.

③ Interference with workpiece.

① Using universal tools

② High accuracy machining can be done

③ Safety

User friendly

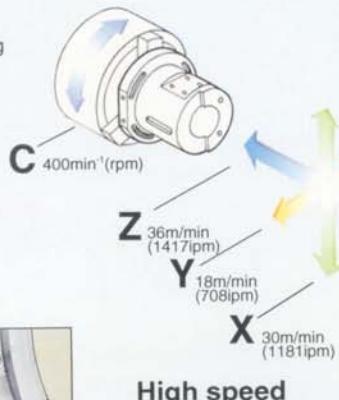

Orthogonal 3-Axis Structure <Patented>

X,Y, and Z axes are positioned at right angles (90°) to each other.

- Reduced programming time.

Programming can be made in the same manner as that of machining centers.

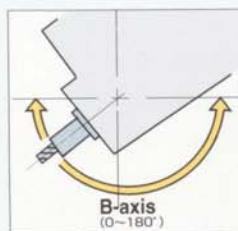

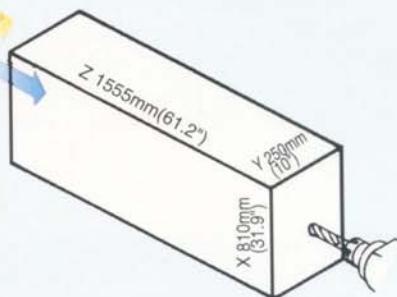

- Tool edge can be seen even during cutting, thus making the operation easy.

High speed

Finishing with the 3rd station(assist station)

Turret NC index
(Contoring B-axis)

It works like a 5 axis machining center.

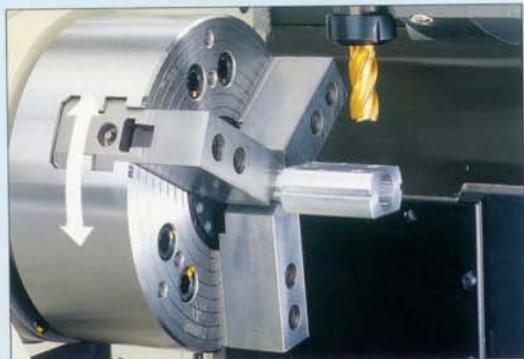

Programming of the tool is just like programming in the Z axis, regardless of the position of B-axis.

Q-Setter <Patented>

- Adjustment of one tool in 40 sec.
- Make tool edge touch the sensor, that's all.
- Q Setter arm slides out above the spindle head. Tool can be measured even with large work or center work in the chuck.
- Stored during machining, so free from chip and coolant.

C-axis control

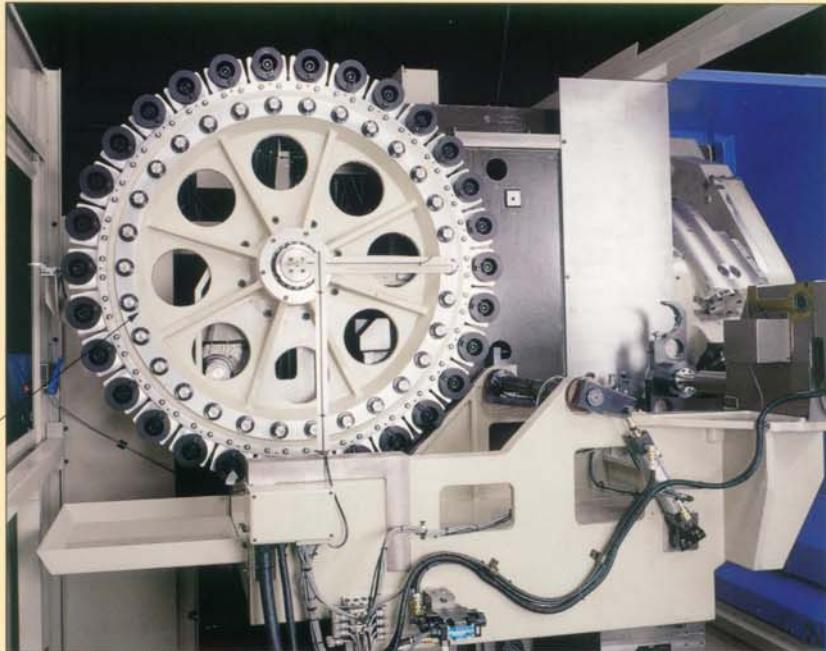

The C axis control, machining tools and axis feed function facilitate machining of a wider range of items.

High Speed ATC

ATC unit of Super HiCELL 400 has double arms just like the machining centers and the tool change is instantaneous. There is no waiting since the next tool is called to the stand-by position in advance of tool change.

30 tool ATC

Sub Spindle <Option>

Complete machining or processing with "One Set-up" using sub-spindle

No idle time between processes

- ↳ Shortens the inter-process time

Synchronized part transfer

- ↳ Improves total machining accuracy

*Rapid traverse
25m/min(984ipm)*

After No.1 (First) process finished, the sub-spindle immediately moves to the workpiece transfer position. After workpiece transfer, No.2 (Second) process starts.

Super HiCELL 400 w/Sub spindle

Chuck size	380mm(15")
Spindle speed	20~3000min ⁻¹ (rpm)
Bar capacity	103mm(4.0")
Motor for spindle	22/15kW(30/20HP)

Super HiCELL400 Machine Specifications

Items		Super HiCELL400	Standard accessories
Capacity	Swing	710mm(28")	● Hydraulic hollow chuck ● Soft jaws ● Chuck op. by M-code ● Tailstock op. by M-code ● C-axis control ● Disc brake device for C-axis ● ATC 30 tools ● Power op. tailstock ● Q-setter ● Flood coolant ● Chuck overhead coolant ● Splash cover (incl. ATC auto shutter) ● Operator side door interlock ● ATC door interlock ● Spindle speed meter on screen ● Spindle load meter on screen ● Separate type machining sp. Load meter ● Spindle/feedrate override ● Call light (yellow) ● Electric leakage detection breaker ● Spindle cooling unit ● Machining completion pre-call/ Work counter/Run hour display on screen ● Work light ● Leveling block ● Spanners & wrenches
	Chuck dia.	380mm(15")	
	Max.cutting dia.(turning)	710mm(28")	
	Max.shaft length	1100mm(43.3")	
	Bar capacity	103mm(4")	
Spindle	Spindle speed	20~3000min-1(rpm)	
	Number of speed ranges	Stepless	
	Spindle nose	A2-11	
	Hole through Spindle	120mm(4.7")	
	Spindle Positioning	0.001deg.	
Turret	Style of turret	SQCT	
	Turret head index	5deg.	
	Travel X-axis	810mm(31.9")
